

LE-SOFT Manuscript

Scope

This manuscript documents the desktop LE-SOFT application from a superadmin perspective. The superadmin role bypasses the route guard in 'ProtectedRoute' and also bypasses feature permission checks in the dashboard navigation, so every page in the app is available.

Access Model

- 'ProtectedRoute' returns the requested page immediately when 'user_role === 'superadmin'.
- 'DashboardLayout' also treats superadmin as full access for menu visibility.
- This manuscript assumes the superadmin can open, create, edit, approve, delete, preview, and configure any page that exposes those actions.

Core Shell Pages

- Login: sign in to the application and restore the user session.
- SetupScreen: configure first-run application settings and Supabase connection details.
- LicenseGate: activate or validate the app license before entering the system.
- Dashboard: view the main operational overview, live activity, and shortcuts.
- Masters: entry hub for accounting, inventory, and procurement master data.
- Vouchers: entry hub for accounting vouchers and purchase bills.
- Reports: entry hub for financial, inventory, and market reports.
- Settings: manage app-level preferences, theme, and operational settings.
- Notifications: review system notifications and workflow alerts.
- Email: manage internal or outbound email workflows.
- CreateCompany: create a new company profile and start a new dataset.

Accounting Masters

- GroupList: view, search, create, edit, and delete ledger groups.
- GroupCreate: create a new group and place it under the correct parent group.
- LedgerList: review all ledgers and their balances.
- LedgerCreate: create or update ledger records used in accounting and billing.
- SupplierManagement: manage supplier ledgers, contact details, and payment settlement status.

Inventory Masters

- UnitList: manage units of measurement such as piece, kg, box, and liter.
- UnitCreate: create a new unit with symbol and decimal settings.
- StockGroupList: organize stock groups and inventory category structure.
- StockGroupCreate: create new stock group hierarchies.
- StockItemList: browse raw materials and stock item records.
- StockItemCreate: create stock items and assign groups and units.
- ProductList: browse the product catalog with search and filters.
- ProductCreate: create or update products, pricing, and inventory metadata.
- PurchaseRequisitions: create multi-line purchase requisitions, track approval states, and view requisition history.

Inventory Stubs

- VoucherTypes: define voucher type templates used by accounting entries.
- Currencies: manage currencies and exchange rate settings.
- Godowns: manage warehouse, store, or storage-location records.

Vouchers and Purchases

- VoucherList: browse accounting vouchers and open them for review.
- VoucherEntry: create or edit voucher transactions.
- PurchaseBillList: review purchase bills and supplier-linked entries.
- PurchaseBillCreate: create a purchase bill and add line items.

Users and Security

- UserList: view, search, edit, enable, disable, and delete users.
- UserCreate: create a new user account and assign a group and role.
- UserGroupList: view, edit, and delete permission groups.
- UserGroupCreate: create a new permission group and assign capabilities.
- ActiveUsers: review active sessions and connected users.
- PermissionLevels: define approval workflows for controlled actions.

Billing and CRM

- Billing: run the POS/billing screen, search products, and create invoices.
- BillHistory: browse historical bills, print copies, and review bill details.
- AlterBill: modify an existing bill when authorized.
- PendingAlterations: review bills waiting for approval or review.
- CRMDirectory: manage customer and CRM records.
- CRMProgress: track sales or customer progress stages.
- CustomerLedgerList: browse customer ledger accounts.
- CustomerLedgerDetail: inspect an individual customer ledger and transaction history.
- ExchangeOrders: manage exchange and return workflows.
- ExchangeCreate: create a new exchange request.

Quotation Module

- QuotationList: browse quotations, preview them, and delete stale records.
- QuotationCreate: create a new quotation and add products or services.
- QuotationPreview: preview or print a quotation before sending it.

HRM Module

- HRMDashboard: view human-resources metrics and shortcuts.
- HRMEmployees: manage employee records and profiles.
- HRMAttendance: review and adjust attendance data.
- HRMLeaves: process leave requests and approval actions.
- HRMPayroll: generate and review payroll records.

MAKE Module

- MakeDashboard: monitor manufacturing or production activity.
- PlaceOrder: place a new MAKE order.
- TrackOrders: monitor the status of production orders.
- AlterOrder: adjust an existing MAKE order when required.

Shipping Module

- ShippingDashboard: manage shipment tracking and shipping-status updates.

Website Admin Module

- WebsiteDashboard: view website commerce metrics and live activity.
- WebsiteProducts: manage products exposed to the website.
- WebsiteOrders: review and process website orders.
- WebsiteCategories: manage website category structure.
- WebsiteProjects: manage project or portfolio-style website content.

- WebsitePages: create and edit website pages.
- WebsiteMedia: manage uploaded website media assets.
- WebsiteNewsletter: manage newsletter subscriptions and campaign data.
- WebsiteSettings: configure website behavior and integration settings.

Reports Module

- TrialBalance: review trial balance totals.
- BalanceSheet: inspect balance sheet structure and totals.
- ProfitAndLoss: view income, expense, and profit analysis.
- StockSummary: review current stock summary and movement.
- DayBook: inspect day-by-day voucher entries.
- MarketAnalysis: analyze product and competitor market data.
- ProductHistoryReport: review product price and history trends.

Other Application Pages

- Gateway: routing or landing entry used by the app for access flow.
- Auth pages are superadmin accessible through the login and setup flow, but they mainly control onboarding and licensing rather than business operations.

Superadmin Usage Summary

A superadmin can use the application to manage the full cycle of operations: company setup, accounting masters, inventory masters, requisitions, vouchers, billing, quotations, CRM, HRM, shipping, website content, email, notifications, user administration, and reporting.

Page Index

The following application pages are included in this manuscript and are intended to be reachable under superadmin access:

- Login
- SetupScreen
- LicenseGate
- Dashboard
- Masters
- Vouchers
- Reports
- Settings
- Notifications
- Email
- CreateCompany
- GroupList
- GroupCreate
- LedgerList
- LedgerCreate
- SupplierManagement
- UnitList
- UnitCreate
- StockGroupList
- StockGroupCreate
- StockItemList
- StockItemCreate
- ProductList
- ProductCreate
- PurchaseRequisitions
- VoucherTypes
- Currencies

- Godowns
- VoucherList
- VoucherEntry
- PurchaseBillList
- PurchaseBillCreate
- UserList
- UserCreate
- UserGroupList
- UserGroupCreate
- ActiveUsers
- PermissionLevels
- Billing
- BillHistory
- AlterBill
- PendingAlterations
- CRMDirectory
- CRMProgress
- CustomerLedgerList
- CustomerLedgerDetail
- ExchangeOrders
- ExchangeCreate
- QuotationList
- QuotationCreate
- QuotationPreview
- HRMDashboard
- HRMEmployees
- HRMAttendance
- HRMLeaves
- HRMPayroll
- MakeDashboard
- PlaceOrder
- TrackOrders
- AlterOrder
- ShippingDashboard
- WebsiteDashboard
- WebsiteProducts
- WebsiteOrders
- WebsiteCategories
- WebsiteProjects
- WebsitePages
- WebsiteMedia
- WebsiteNewsletter
- WebsiteSettings
- TrialBalance
- BalanceSheet
- ProfitAndLoss
- StockSummary
- DayBook
- MarketAnalysis
- ProductHistoryReport

Notes

- This manuscript is intentionally written for superadmin access, because superadmin bypasses protected-route and menu permission checks.
- If the product team wants a customer-facing version later, the content should be split into role-specific manuscripts for admin, manager, operator, and superadmin.
